Logos

I've always been fascinated by logotypes, ever since I was a kid, while my friends where interested in cars, I was more intrigued by their symbols. I loved the idea that a few lines can represent something serious.

MODERN CONSTRUCTION

a construction company
located in New Jersey

an aspiring photographer
based out of Warsaw, Poland

an antique dealer with a focus in Russian samovars
based out of Warsaw, Poland

three time world champion in boxing, currently
aspiring for his fourth championship in a third
weight class. Tomasz Adamek, from Poland.

Websites

Since receiving my first computer in '96 - the 66Mhz, 500mb hard drive, and a 9.6Kb modem - I've been focused on how computers can help me express my creativity. Whether it was creating my first HTML website, or manipulating my first Jpeg scans in Photoshop, I knew it was what I wanted to do for the rest of my life. Since then, I've become quite comfortable doing graphics as well as applying logic when programming server side languages.

I was selected to design and develop the official website for the Polish champion Tomasz Adamek.

It is developed in PHP and MySQL to allow the champ to manage content, and communicate directly with fans.

Websites

My first contact with server side languages was to Cold Fusion in 2000, since then I've expanded my knowledge to other areas of server side programming, which includes PHP, MySql, Sql Server, AJAX.

Worked jointly with the Principal Agents in order to integrate and create all the workaday functions that characterize their business needs in this multi-user database driven website.

It was developed in ColdFusion and MySql.

Professional Television Network Is a peer-board reviewed, credible, and physician-validated home-based private digital television network for physicians and healthcare professionals. I was hired to develop from scratch a "Project Management System Database" to allow employees to manage projects, share information between departments, and create a system to manage and delegate tasks internally.

Print When it comes to designing content for print, to me, there is no better tool than Illustrator. I love the sharpness and precision of vector lines. The ability to choreograph all elements to make a design piece work.

Print

What I particularly enjoy about the print medium is that it carries the possibility of existing in the physical world. Wether as apparel or posters or packaging, to me it is very exciting to see my work worn or displayed on the shelf.

\\2010\\ Calendar

A1 Poster of a yearly calendar, with room
for notations.
