Cold Fusion, Lead Developer

www.healthcasts.com/

- Worked independently by analyzing the obsolete workflow of procedures and incorporating it into a modern infrastructure based on SQL Database and Cold Fusion.
- Utilized Ajax and Cold Fusion in conjunction to create a modern interface that allows information to be displayed and updated simultaneously as well as in a ordered and comprehensive manner.

Professional Television Network is a peer-board reviewed, credible, and physician-validated home-based private digital television network for physicians and healthcare professionals. I was hired to develop from scratch a "Project Management System Database" which would allow employees to manage projects, share information between departments, and create a system to manage and delegate tasks internally.

2005 - 2008

company/
Cornerstone Property
Group, Inc.

contact/
Edmond Levy, Principal
elevy@cornerstonepg.com

212 564 3700

Web Master/Lead Developer

www.cornerstonepg.com/

- Created a multi-level database that stored data about clients, properties, employees, and company financials.
- Designed the internal and external graphical interface to create proper workflow and ease of use.
- As the company moved to a new office, my responsibilities included the setup and management of the office network of 50 computers.

I was hired as the architect of a web presence for a young Real Estate agency in New York, which, thanks to the successful development of the web-based application, allowed for the expansion, management of clientele, properties, and agents alike. Worked jointly with the Principal Agents in order to integrate and create all the workaday functions that characterize their business needs.

2001 - 2005

company/
Skidmore College
